# **Ling 573 Summarization Presentation**

## **Thomas Marsh**

University of Washington ling 573, Spring 2015 sugarork@uw.edu

## Michael Roylance

University of Washington ling 573, Spring 2015 roylance@uw.edu

### **Brandon Gahler**

University of Washington ling 573, Spring 2015 bjq6@uw.edu

### **Abstract**

Abstract is a strange name for a summary. It is not really abstract at all.

#### 1 Introduction

This is the introduction. It will introduce things.

## 2 System Overview

A description of the major design, methodological, and algorithmic decisions in your project. It often includes a schematic of the system architecture.

## 3 Approach

This section should provide the details of the major subcomponents of your system.

#### 4 Results

This section should present the major results of the formal evaluation of your system and components.

## 5 Discussion

This section will analyze your results in a bit more detail. It is an appropriate location for error analysis and assessment of the strengths and weaknesses of the different components.

### 6 Conclusion

Conclusions have been made as can be seen from the following Nenkova, Radev, and Jones (Nenkova et al., 2007) (Jones, 2007) (Radev et al., 2001)
